

Q & A

What is Super Immune Space Sprinkles™?

Super Immune Space Sprinkles™ is a uniquely effective immune booster specially designed to help children stay well.* It combines the immune enhancing power of Nat-Stim® with 6 of the most important strains of friendly bacteria (probiotics) known to promote healthy intestinal balance in children.* When added to liquids or moist food this completely natural, slightly sweet tasting pink powder turns bright magenta. Kids love to sprinkle it in milk or on their cereal, so there is no problem getting them to take it. Taken daily it activates specific and general immune factors to promote a healthy immune response and help maintain good health.*

How does Super Immune Space Sprinkles™ work?

Super Immune Space Sprinkles™ is formulated to activate specific and general aspects of immune function necessary for maintaining health.* It contains Nat-Stim® which is designed to augment both cellular (T-helper cells, T-suppressor cells, Natural Killer cells, macrophages, interferons, and interleukins) and humoral immune components (B-cells and immunoglobulins).* This gives it a broad scope of immune enhancing activity.* Neither Super Immune Space Sprinkles™ nor Nat-Stim® are pharmaceuticals, rather they naturally build up and support immune system function for optimal immune defense.* Its 6 types of probiotics support a healthy floral balance in the intestines, which is important because the intestinal tract is one of

Q & A

the vital first lines of defense in the body's immune system.* Healthy immune function, especially in the lungs, bronchi, throat, nose and intestines, is the secret to getting well and staying well. Super Immune Space Sprinkles™ is designed to promote strong immunity in all of these areas. Taken daily, the effects of this very unique supplement deepen over time, helping to provide long term support for healthy immune function.*

What are the ingredients in Super Immune Space Sprinkles™?

This is a color-changing powder made of natural ingredients. It contains the immune booster Nat-Stim® (a proprietary blend containing: lipopolysaccharide, peptidoglycan, glucosamine, acetylmuramic acid, murein, & Lactobacillus bulgaricus) and a probiotic blend designed for children consisting of Lactobacillus acidophilus, Lactobacillus rhamnosus, Lactobacillus salivarius, Lactobacillus plantarum, and Bifidobacterium bifidum & longum, in a base of xylitol, organic evaporated cane juice, FOS, and organic dried beet juice extract. Super Immune Space Sprinkles™ is a VEGETARIAN product that is DAIRY and GLUTEN-FREE.

How do I know if my children should take Super Immune Space Sprinkles™?

Strong, effective immune function is a major factor in staying well. Young, developing immune systems can often use extra support, especially in daycares, schools, camps and around siblings.*

How quickly will Super Immune Space Sprinkles™ begin to work?

Q & A

Although Super Immune Space Sprinkles™ can make a difference in as little as 2 days, it usually takes about 2-3 weeks to really begin working.*

How long should I give my children Super Immune Space Sprinkles™?

In our experience, the longer and more regularly it is taken the better it works.* Super Immune Space Sprinkles™ effectively sustains immune enhancing actions that are very important to young bodies, and does not diminish in effectiveness with continued use.* In addition, because it promotes a strong immune response, it often helps cut down recovery time.* After 3 months of taking it regularly many people find they can halve the dose and still maintain the same level of immune support.*

Does Super Immune Space Sprinkles™ have any side effects?

Only beneficial ones! Although millions of doses of its main ingredient (Nat-Stim®) have been consumed annually for many years in Europe, no detrimental side effects have ever been reported.* The acidophilus strains used in Super Immune Space Sprinkles™ have also been used safely for years with children.* If you notice excessive gas after beginning to use this product, simply reduce the amount you use.

How do I use Super Immune Space Sprinkles™?

It is very easy – just sprinkle ¼ tsp once or twice a day in a beverage or on moist food such as cereal or fruit, at breakfast or bedtime.
